

# “The Rocket” Grain Guard

## Aeration Systems From Edwards

As grain is augered in the bin, fines collect in the centre. This results in a densely packed core which is hard for air to penetrate.

### Grain Guard System overcomes this by:

- Forcing air into the centre of the bin.
- Providing a drying front that conforms to the pile of grain.
- Reducing static pressure.
- Reducing drying time by as much as 50%.

### GG 6000 Slim Rocket

Freight not included. 3016045

**1259<sup>00</sup>** each

### GG 7000 6' Rocket

Freight not included. 3016060 (direct).

**1949<sup>00</sup>** each

### GG 7000 8' Rocket

Freight not included. 3016078

**2319<sup>00</sup>** each

## Edwards Low-Temperature Grain Drying Heaters

When mother nature won't cooperate, low temperature grain drying heaters take over! Co-op markets the complete line of Edwards low temperature electric and propane heaters. These heaters allow moisture removal from grain in high humidity situations as they lower humidity by 25% - 50%.

### Available models:

#### 18" Round Propane/Natural Gas Heater

60,000 BTU output. 3016292

#### 9" x 14" Propane/Natural Gas Heater

100,000 BTU output. 3016318
